

Mito Energy Station

Mito Energy Station is a device designed to meet today's energy and internet requirements. It provides charge opportunity for 8 devices at the same time. In addition to providing charging facilities it has free internet connection and passenger information system, also it has voice information infrastructures for partially-sighted.

Mito Energy Station gets its power from solar energy and provides uninterrupted green energy service.

In natural disasters, it can be an emergency point.

It has 7" outdoor screen which is used for smart stop display.

Passengers can get instant information about news, weather forecast, traffic and timetable for buses, trams etc...

The entire system can be monitored from a single center.
